Edition I/2024/A

LUKRECJA 1, ST CPL OAK facing layer, handle: BELLA SLIM, satin brass

## doors are our world

Every house is filled with interior doors. This is why approaching doors only from the point of view of their functionality and practicality has long been insufficient. Underlining the best qualities in a perfectly furnished house, today they are an important component of interior design. For this reason, we create modern solutions, introduce a reactive design and focus on the quality of workmanship to let you enjoy the choice of the Erkado doors.

We are committed to developing all business areas relevant for creating a product that meets your expectations.

We

achieve this goal by investing in technologically advanced production lines, staff training and systematic analysis of consumer needs. Our dynamic development would be impossible without the activity of the sales network

participants.

Thank you for your inspiring suggestions and friendly feedback.

## DESIGN

- rebated, non-rebated or reverse door leaf
- MDF stiles and rails covered with two HDF boards in GREKO facing layers
- internal timber stiles and top rail, MDF bottom rail, covered with two HDF boards in CPL and PREMIUM facing layer
- rigid honeycomb infill or solid core infill for additional charge
- optional door frame extension panels and a crossheads with pilasters are available for surcharge, pp. 139-141
- the door can be trimmed by a customer, go to p. 137 for details

## FINISH

- HDF board with a facing layer
- door leaf edge made in the STANDARD technology.
- edge (in standard or non-rebated finish) faced with an edging in the same colour as the surface or, optionally, in plain black (black edging with transverse NATUR OAK PREMIUM, a black edge with a transverse structure)

## HARDWARE

- three pin mortise hinges in a rebated door leaf
- three concealed hinges in the non-rebated leaf and two hinges in the reverse leaf (third for an extra charge) in silver (black or gold for an extra charge); hinges are supplied and priced with the door frame
- a lever tumbler lock in the rebated door leaf and a magnetic lock (lever tumbler lock as an option) in the non-rebated door leaf, optionally: key-locked, thumb turn cylinder, economy or with a silver blockade; or optionally, for an extra charge, a black or golden magnetic lock
- a magnetic lock in the reversed-swing door, optionally: key-locked, thumb turn cylinder, economy or with a silver blockade; or optionally, for an extra charge, a black or golden magnetic lock

## GLAZING

- **tempered frosted Decomat glass as standard**, clear or, for an extra charge, frosted VSG 221 safety glass, plain on both sides
- possibility to change the glazing side to REVERSE (standard glazing for OBVERSE)

## HOW TO SELECT A LOCK CORE

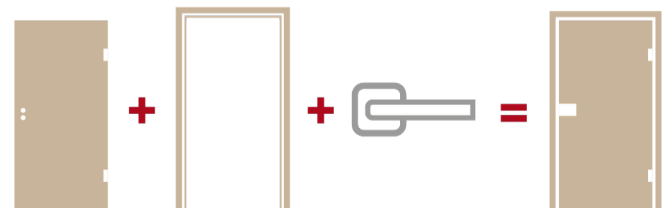

Example of calculating the lock core size for the flush and panelled doors (40mm) with the escutcheon thickness of G = 7mm  
 $A/B = (C+G+3) / (D+G+3)$   
 $A/B = (15+7+3) / (25+7+3)$   
 $A/B = 25/35$

Door type	Door leaf thickness	Proportion of lock setting in door (C/D)	Recommended lock core size (A/B)*
flush, panelled (rebated)	40mm	15/25	26/36
flush, panelled (non-rebated)	40mm	20/20	30/30
reverse	40mm	15/25	26/36
HERSE	46mm	15/31	30/45
LEDA EI 30	50mm	19/31	30/40
LEDA EI 60	60mm	19/41	30/50
FORTECA RC2 & RC3	46mm	20/26	30/40
HYPERION EI30 RC2	50mm	19/31	30/40

\* Recommended lock core size for the escutcheon thickness of 7mm and play of 2mm to 4mm

## HOW TO CALCULATE DOOR PRICE

- double doors 

## DOOR FACE FINISH TYPES

### GREKO

The Greko foil is also pre-impregnated, which means printing and then coating with paint with required properties. Using the performance finishing coats adds to the surface's resistance and flexibility of the product. The paint's silicon content ensures the film resistance is enhanced. The Greko foil is manufactured on a high density Japanese base layer which is not resin coated. This makes the film ecological, healthy and safe for people and environment both in the production process and during use, as well as for disposal. No formaldehyde or other harmful ingredients is used. Its distinctive patterns are what distinguishes the Greko film. The facing layers bear striking resemblance to wood, as the high quality surface comes with a 3D natural wood effect. The facings look just like wood.

### PREMIUM

The PREMIUM facing is a product based on Polypropylene (PP), a material of very high resistance to abrasion and scratching, plus top quality appearance. It adds a refined look and individual character to the doors, as it imitates natural wood perfectly. Not only does the PREMIUM facing attract with its appearance but with its functionality, as it resists scratching better than average products and is fire-retardant and abrasion resistant. These properties ensure the extended longevity and maintenance-free use of the PREMIUM range products even in most adverse conditions.

### ST CPL, CPL 0.2 and CPL 0.7

The CPL facing is composed of a decorative layer impregnated in resins, and a base layer ensuring flexibility. Following the lamination process, the top resin layer is hardened for high resistance to scratching and abrasion. It is characterised by high resistance to impact, abrasion, scratching, heat and UV radiation. Thanks to using this type of material, the door can be installed in so-called "difficult" interiors [exposed to heat, moisture or extraordinary use]. Approx. laminate thickness: ST CPL - 0.15mm, CPL 0.2 - 0.2mm and CPL 0.7 - 0.7mm. The CPL 0.7 laminate is used to cover only one leaf plane thanks to its unique hardness. The CPL 0,2 and CPL 0,7 laminated door leaves come with the leaf edge made of the so-called ABS, a highly durable PVC. ST CPL facing in white, light grey, cappuccino, black has been refined in the AntiFinger coating

### UV VARNISH

The door surface has several coats of the WHITE TITANIUM UV modern UV hardened varnish. The flat surfaces are covered with a specialist base membrane in the first phase, and then coated twice with a top quality paint and hardened with UV. The moulded surfaces cannot be covered with the membrane for technological reasons, so they are coated with three paint layers and hardened with UV. The fully automatic coating process follows scanning to ensure ideal quality of the surface. Hardening the paint with the curing-edge method involving UV light source ensures very high mechanical resistance.

limiting dirt and fingerprints. **NEW**

## EDGE FINISH TYPES

### SOFT EDGE

The SOFT door leaf comes with a chamfered edges, which lends an aesthetic and modern look to it. The leaf is finished with a facing layer of an improved resistance to scratching, which dramatically enhances its resistance during use.

### STANDARD EDGE

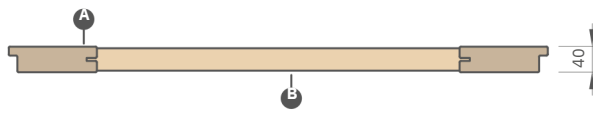

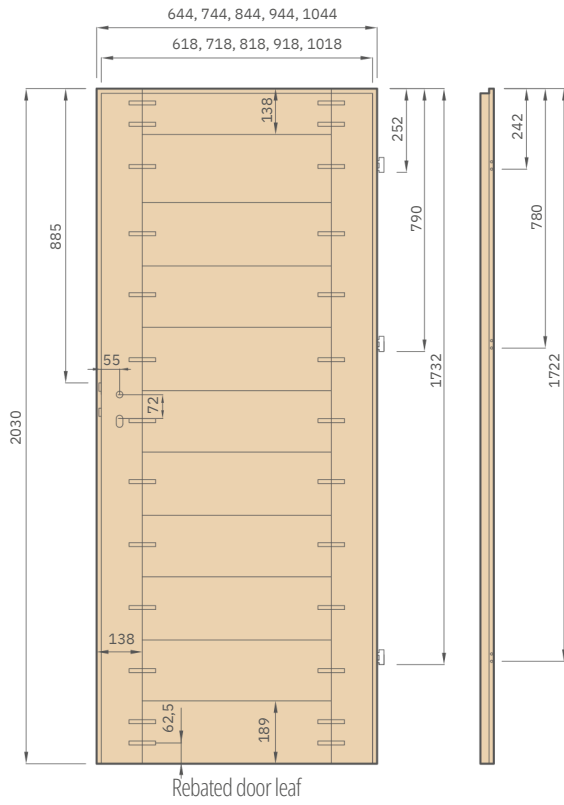

It involves covering the flat plane with the 0.15 mm ST CPL, CPL 0.2, CPL 0.7 facings, polypropylene PREMIUM facing or GREKO foil. The door leaf made in STANDARD technology has unchamfered edges, which is where the face panel is joined with edges facing, as shown in the diagram. The veneer in the CPL 0.2 and CPL 0,7 laminates is made of very durable PVC, the so-called ABS. The joining method of the facing is also identical for the non-rebated doors and non-rebated sliding systems.

<sup>1)</sup> applies only to BALDUR 1 in WHITE ST CPL facing with solid core filling

**STILE PANELLED DOOR**

- A** MDF stiles
- B** MDF rails

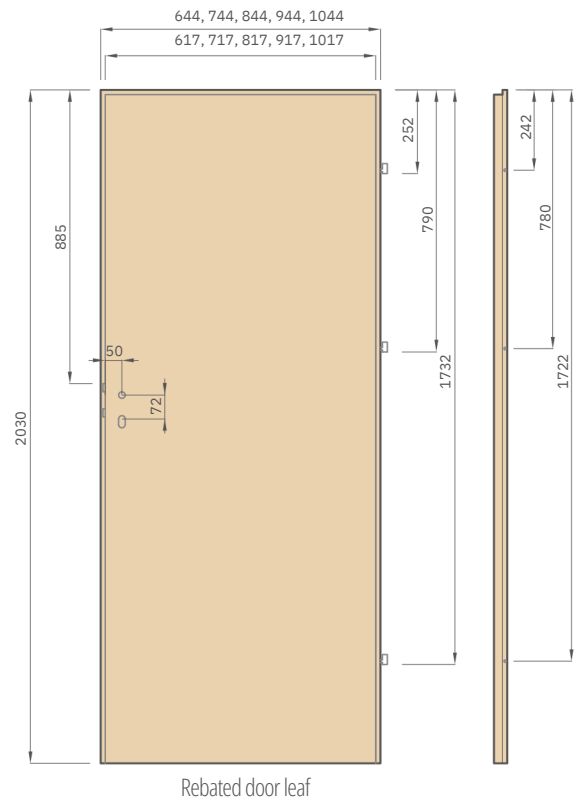

Solid 35mm or 22mm thick rail

Aesthetic frameless tongue-and-groove glazing without bars

**FLUSH DOOR**

- A** MDF board; **B** basket;
- C** HDF board; **D** filling;
- E** MDF or timber stiles in Herse SET and UNO PREMIUM

**FILLING TYPES**

Honeycomb

Solid core filling

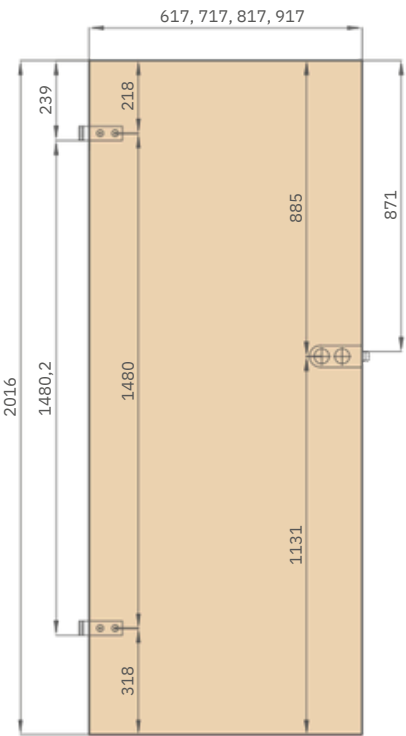

MDF stile for the GREKO, PREMIUM and CPL facings, also with the AntiFinger coating

**NEW**

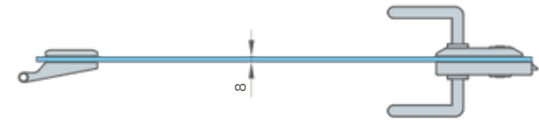

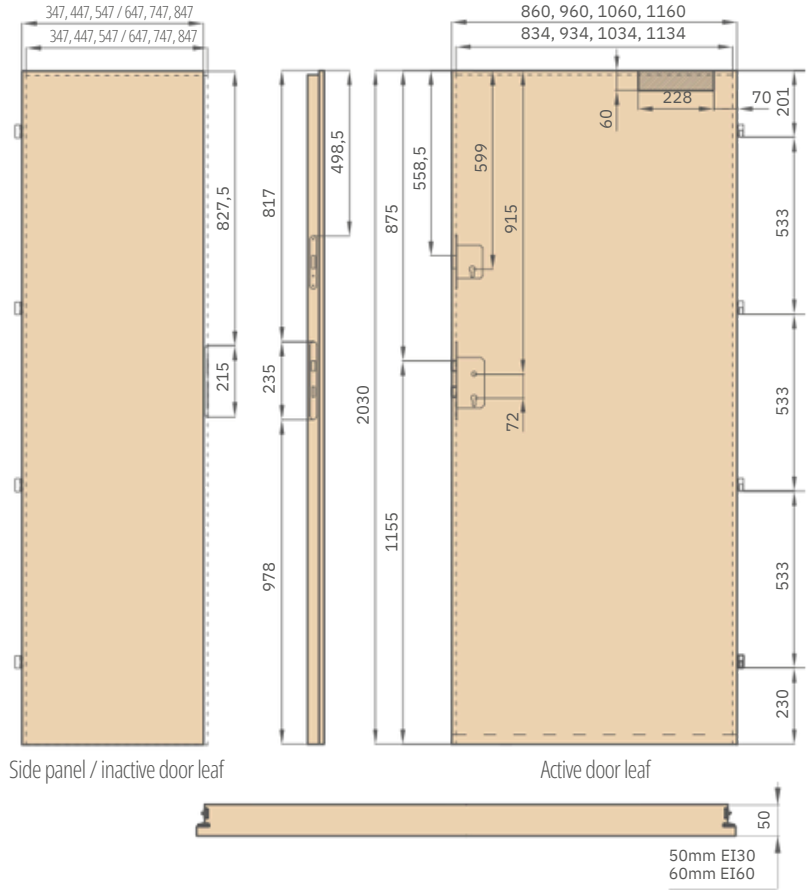

Glulam timber stile covered with HDF and MDF boards available at a surcharge for the following facing layers: WHITE PREMIUM, OAK NATUR PREMIUM, GRAPHITE ASH PREMIUM, GREY MAPLE PREMIUM, OAK ST CPL

The honeycomb and the solid core filling in the flush doors ONLY. For the solid core doors we add a third hinge as standard.

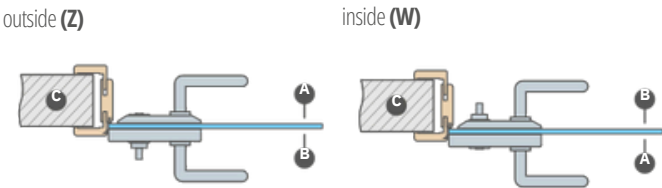

**GRAF GLASS PANEL**

**FIRE DOOR LEAF**

**BATHROOM TURN & RELEASE**

**A** Corridor; **B** Bathroom; **C** Wall

Bathroom lock – for turn and release locks, select:  
 OUTSIDE lock – with the bathroom turn and release is fixed to the outside of the door (Z)  
 or  
 INSIDE lock – with the bathroom turn and release is fixed to the inside of the door (W)

**NOTE: Directions for the turn and release locks apply (R/L)**

Specially designed HALSPAN board filling 44mm [EI30] / 54mm [EI60]

## CONCEALED MAGNETIC STOPS

NEW

glossy chrome, chrome satin, glossy brass, colourless, white semi-mat, black semi-mat

We assemble the magnetic door stop in a special place milled for this purpose on our own. Product delivered as a separate assortment.  
Caution (important information in case of underfloor heating): the floor element should be placed in the  $\varnothing 14$ mm hole, 45mm deep.  
Magnetic door stop not available for double-leaf doors.

## METAL CAPS FOR HINGES

brushed nickel, patina, glossy chrome, glossy brass, white mat and black mat

Available casings:

- for Herse/Forteca  $\varnothing 16$ , length 47mm in colours: brushed nickel, patina, chrome gloss, brass gloss, white and black
- Hyperion, Leda  $\varnothing 16$ , length 64 mm in chrome mat and black colours
- for interior leaves  $\varnothing 15$ , length 47mm in colours: brushed nickel, patina, chrome gloss, brass gloss, white and black

## VENTILATION

Square and round metal sleeves

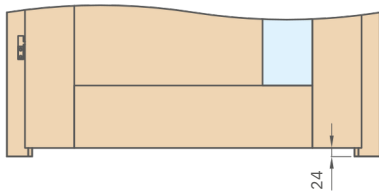

Plastic woodgrain sleeves for STILE panelled doors for GREKO, PREMIUM and CPL facing layers

Grilles

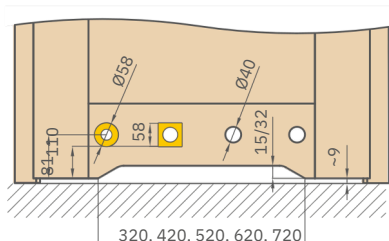

## VENTILATION FOR AIR TIGHT HOMES

**Enhanced airflow trim** – a door is cut at the bottom by 15 mm along its full width. According to standard, doors have to allow a gap of approx. 9 mm above a final floor covering, so a total air gap, including the enhanced airflow trim, is approx. 24 mm.  
Enhanced airflow trim not available in the double-leaf door version.

## STANDARD VENTILATION (H. 32 mm) or MINI (H. 15mm)

Air gap undercut is not available in non-rebated doors for wall-mounted and pocket sliding doors.

## ELECTRIC DOOR STRIKE

(available for fixed and adjustable door frames for rebated and non-rebated doors, see p. 168-171 but unavailable for the door frames used with the GRAF glass panes and double doors)

Types of electric door strikes:

- basic 12 V
- basic 24 V
- switch operated 12 V
- switch operated 24 V
- reverse 12 V
- reverse 24 V

BASIC – normally closed, and opened when voltage is fed

SWITCH OPERATED – same operation as in the basic strike, but with an option to be switched off by moving the springbolt

REVERSE – closed when voltage is fed, opened when not

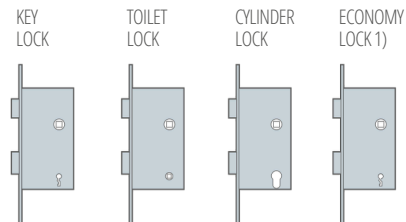

The reverse and switch operated electric door strikes unavailable for the fire doors

## CUTTING THE DOOR LEAVES

Cutting the door leaves to size by customer acc. to Polish standard, up to 50mm, or up to 80mm for the HERSE SET door leaves (unless pre-cut), as well as in the flush doors, is possible if an additional lower rail has been fixed by the manufacturer. (NOTE: cutting the door leaves to size by customer is not allowed for the FRAGI doors, double and fire doors, non-rebated leaves for sliding systems, glass GRAF doors, FORTECA RC2 and FORTECA RC3 burglar-proof doors, and panelled doors acc. to the CZ standard). **The door leaf height made acc. to the so-called CZ standard is lower than the PL standard by 47mm. Factory shortening of the door lowers the handle by the same height.**

Leaf type	Handle height as per PL standard (measured from the bottom edge of the door) [mm]
STILE rebated panelled leaves	1107
STILE non-rebated panelled leaves	1110
rebated flush doors	1110
non-rebated flush doors	1110
reverse flush door	1110
GRAF glass doors	1131
FORTECA RC2 & RC3 doors	1038
HERSE, HERSE AKUSTIC doors	1107
HERSE door with a strip lock	1033
HERSE UNITED door	1117
LEDA E130, E160 door	1115
HYPERION E130 RC2 door	1033

## HARDWARE – LEVER TUMBLER LOCKS

### LOCK PZ CENTRES:

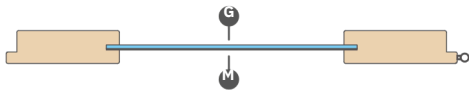

- The magnetic lock PZ centres:
  - for keys, toilet doors: 90mm
  - for lock cores: 85mm
  - (non-rebated door leaves with a magnetic lock and reversed swing doors)
- The lever tumbler lock PZ centres:
  - for keys, toilet doors, lock core: 72mm
  - (rebate door leaves and non-rebated door leaves with optional lever tumbler locks)

The toilet locks have a square-shaped bolt hole:

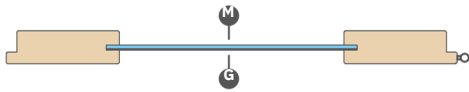

- acc. to PL standard: 4mm
- acc. to CZ standard: 6mm

<sup>1)</sup> lock provided without a keyhole in the leave

## STANDARD "OBSERVE" GLAZING

## "REVERSE" GLAZING MADE TO ORDER

## INSTALLATION OF FRAME FOR NON-REBATED DOOR FRAMES

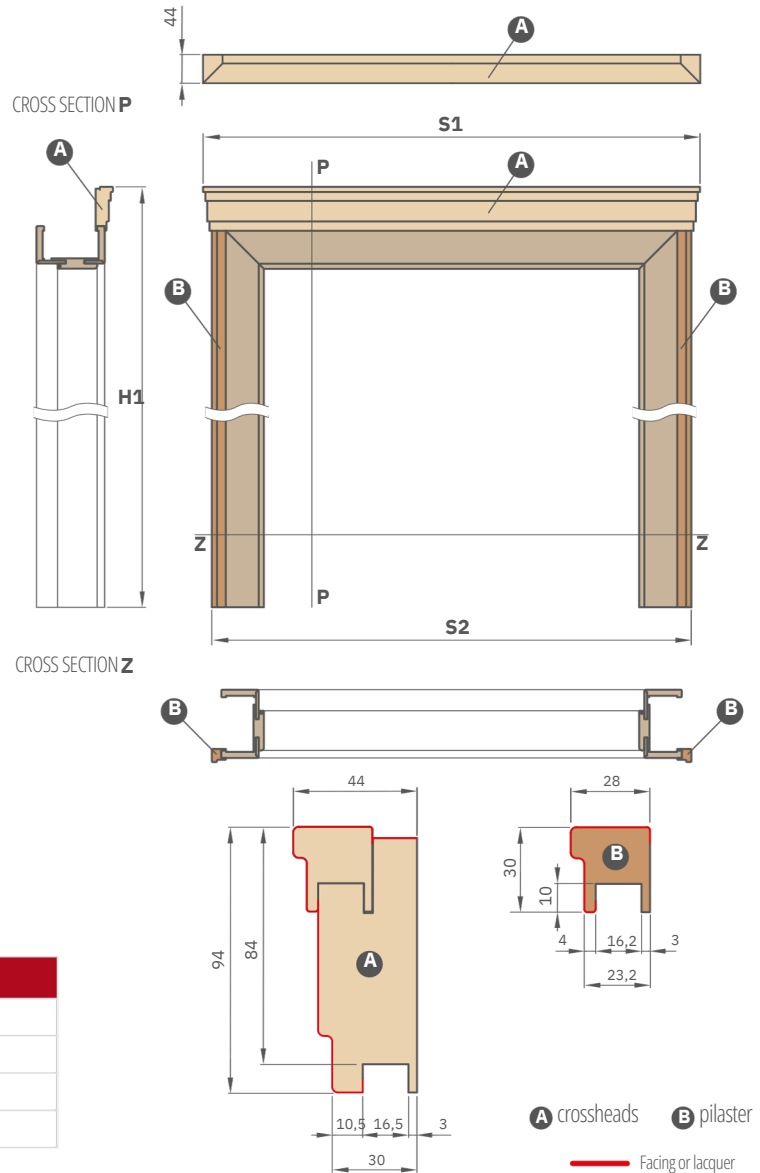

- A) Drill holes for metal screws of min length 80mm x Ø6mm
- B) Apart from installation foam, mounting anchors are required when installing the door frame. Drill the holes for screws under the gasket so that it hides them.

# SLIDING SYSTEMS

## WALL-MOUNTED

### WALL-MOUNTED SLIDING DOOR SYSTEM:

<b>SINGLE SP1Nz</b> (with bolt keeper)	
<b>SINGLE SP1Nb</b> (w/o bolt keeper)	
<b>DOUBLE SP2N</b>	

Price includes:

Aluminium track with a cover profile and door stop in the colour of the door leaf and length:

- 210 cm for "100" leaves
- 200 cm for "90" leaves
- 180 cm for "80" leaves
- 150 cm for "70" "60" leaves

#### Available wall-mounted sliding system sets

- track with a cover profile and door stop with gasket (only SP1Nz & SP1Nb)
- track with a cover profile and tunnel door frame (only for SP2N)
- track with a cover profile and door stop + tunnel door frame (only SP1Nz & SP1Nb)
- track with a cover profile and door stop with gasket + tunnel door frame (only SP1Nz & SP1Nb)

The SP1N and SP2N wall-mounted sliding door system with selected door leaves is also available as per the PL2112 standard.

The non-rebated door leaf for wall-mounted sliding system cannot have an air gap undercut.

The cover profile is neither laminated nor paint coated on the inside.

### EXTRA CHARGES

#### "tunnel" type adjustable door frame

included in the price of the adjustable frame

#### hook bolt lock with hardware 2)

only for the single door system

#### oval, rectangular or round pull handle

glossy chrome, brushed chrome, glossy brass, black matt; two pcs. of pull handles per set

#### synchronisation

simultaneous opening and closing of the door leaves using only one leaf; only for SP2N

#### crossheads and pilasters

#### damper 3)

automatic leaf damping during the final closing phase  
only for SP1Nz and SP1Nb

#### standard 2112

surcharge for door leaves under standard 2112 and as the "tunnel" version

### ROUND, OVAL AND RECTANGULAR PULL HANDLES 1)

Glossy chrome, brushed chrome, glossy brass, black matt

<sup>1)</sup> in the BALDUR 8 model, the oval and square pull handles overlap the moulding

### HOOK BOLT KEY LOCKS

glossy chrome,  
brushed chrome,  
glossy brass,  
matt black

Key only in silver

The hook bolt key lock comes with two pull handles to choose

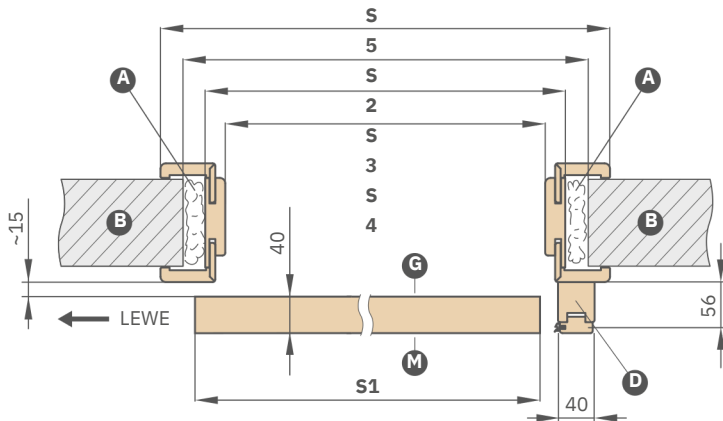

<sup>2)</sup> NOTE: the height of the oval pull handle for the key / toilet door variant varies and is:  
key: 1006 mm, toilet option: 1015 mm (measured from the bottom edge of the leaf)

<sup>3)</sup> apply only on single side

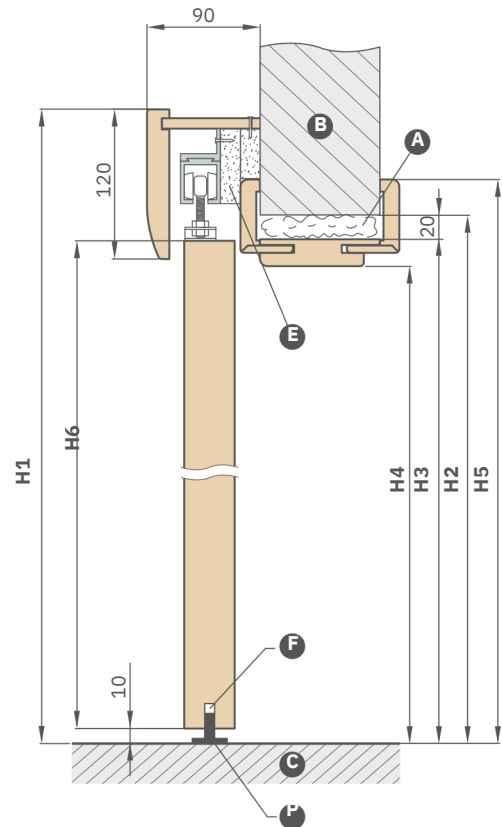

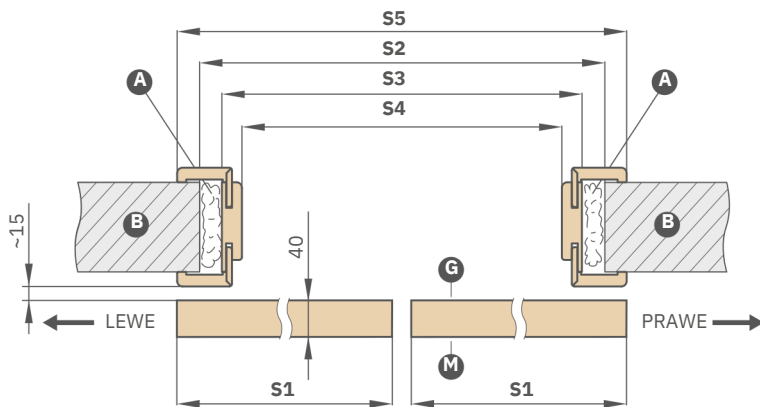

# WALL-MOUNTED SLIDING DOOR SYSTEM

## LOFT Type

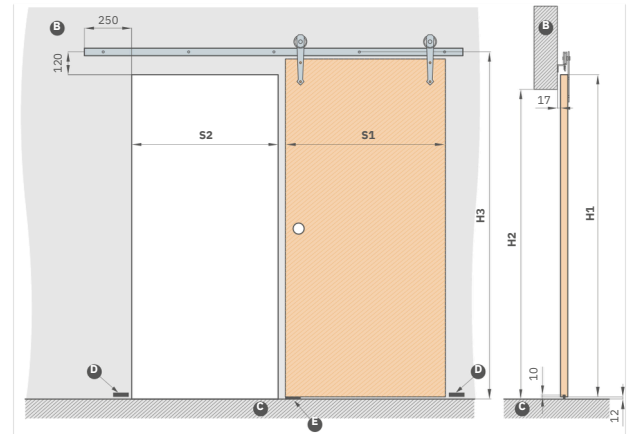

LOFT door leaf, OAK ST CPL facing layer, round pull handle, RETRO door hangers

LOFT Type wall-mounted sliding door system is available in black and incorporates the LOFT Type solid core door leaf. The LOFT door leaf comes with a rigid honeycomb infill as standard or solid core panel for extra charge. The door leaf features a non-rebated edge. The system is designed for clear finished opening, without a tunnel. The complete system includes the sliding LOFT system + LOFT door leaf + pull handle + door closer on one or both side(s). The LOFT double door system is counted as 2 x single door system + connecting rail element. Three door hangers to choose from: INDUSTRIAL, RETRO and ART.

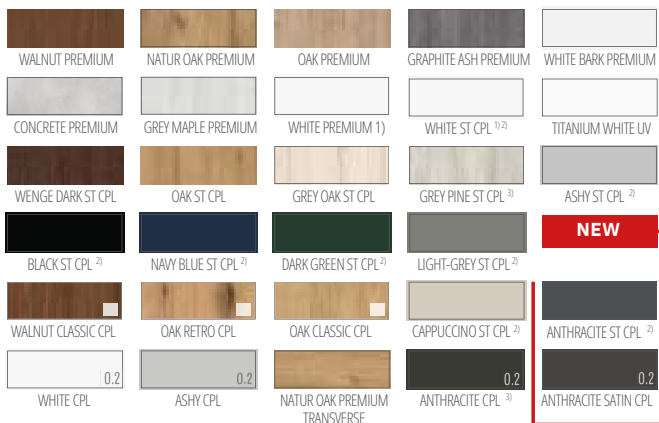

### LOFT sliding door system

- oval, rectangular or round pull handle
- solid core filling
- round and square metal ventilation sleeves (4 pieces); black matt
- door closer on one side
- connector for tracks (enables the use of the LOFT system in the double door system)
- black door leaf edge finish

# WALL-MOUNTED SLIDING DOOR SYSTEM

## MAGIC Type

MAGIC door leaf, OAK PREMIUM facing layer, oval pull handle

MAGIC Type wall-mounted sliding door system incorporates the MAGIC Type solid core door leaf only. The MAGIC door leaf comes with a rigid honeycomb infill as standard or solid core panel for extra charge. The door leaf features a non-rebated edge. The system is designed for clear finished opening, without a tunnel. The complete system includes the sliding MAGIC system + MAGIC door leaf + pull handle. The system is only available as a complete set (system + leaf).

## POCKET SYSTEMS

**ERKADO pocket door system range includes:**

BASIC TUNNEL INSTALLATION		
SP1C.100		Single "100" pocket sliding system only available for STILE panelled doors, painted doors and ALTAMURA 1, UNO PREMIUM and UNO LUX models
SP2C.100		Double "100" pocket sliding system only available for STILE panelled doors and ALTAMURA 1 and UNO PREMIUM models
SP1C.125		Single "125" pocket sliding system
SP2C.125		Double "125" pocket sliding system
ZN1		One-sided supplementary basic in-wall installation for SP1C.100 or SP1C.125 system
ZN2		One-sided supplementary basic in-wall installation for SP2C.100 or SP2C.125 system

**Not available for CPL0.2 & CPL0.7 laminates**

$$\text{SLIDING SYSTEM PRICE} = \text{DOOR LEAF PRICE} + \text{ALUMINIUM POCKET PRICE} + \text{BASIC TUNNEL INSTALLATION PRICE} + \text{OPTIONAL INSTALLATION PRICE ZN1 OR ZN2}$$

### Standard single/double pocket sliding system includes:

- aluminium case [LEON] SP1 aluminium case [LEON] SP2 non-rebated door leaf /
- two non-rebated door leaves – price for standard door leaf / price for two door
- leaves basic tunnel installation (see table above) tunnel installation ZN1 or ZN 2 – see table on the next page
- 

### EXTRA CHARGES

frame joints at 90 degrees

#### hook bolt lock with hardware 2)

only available for: SP1C.100, SP1C.125

#### oval, rectangular or round pull handle

glossy chrome, brushed chrome, glossy brass, black matt

available for SP1C.100, SP2C.100, SP1C.125, SP2C.125

pull handle set includes two pcs.

#### finger pull

glossy chrome, brushed chrome, glossy brass, black matt

#### synchronisation

simultaneous opening and closing of the door leaves using only one leaf

only available for: SP2C.100, SP2C.125

#### crossheads and plasters

#### damper<sup>3)</sup>

automatic soft close in the final closing phase; available for SP1C.100, SP1C.125 only

#### standard 2112

surcharge for door leaves under standard 2112, pockets and housings

### ROUND, OVAL AND RECTANGULAR PULL HANDLES 1)

glossy chrome, brushed chrome, glossy brass, black matt

### HOOK BOLT KEY LOCKS

glossy chrome,  
brushed chrome,  
glossy brass,  
matt black

Key only in silver

The hook bolt key lock comes with two pull handles to choose

<sup>1)</sup> in the BALDUR 8 model, the oval and square pull handles overlap the moulding

<sup>2)</sup> NOTE: the height of the oval pull handle for the key / toilet door variant varies and is:

key: 1006 mm, toilet option: 1015 mm (measured from the bottom edge of the leaf)

<sup>3)</sup> apply only on single side

# SINGLE AND DOUBLE DOOR SYSTEMS

## POCKET SYSTEMS

### SP1C.100 (left, AWERS obverse glazing)

Fixed range of 100 mm

Pocket thickness before gypsum board installation – 75 mm

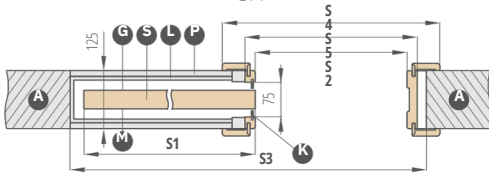

For UNO PREMIUM, ALTAMURA 1 only, and for all panelled doors.  
The system does not come with dust brushes (not required).

### SP1C.125 (left, AWERS obverse glazing)

Fixed range of 125 mm

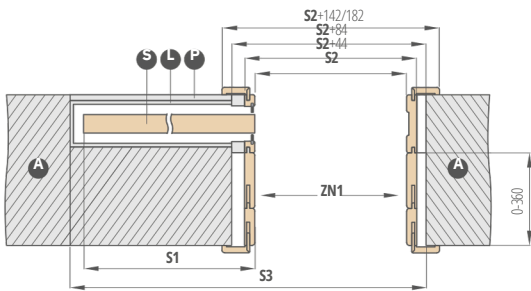

Pocket thickness before gypsum board installation – 100 mm

Only for use with flush doors which are supplied with a glass frame.  
The system includes grey dust brushes.

### ZN1 one-sided basic in-wall installation for SP1C.100 and SP1C.125

Basic in-wall installation range from 0-40; 40-60; ... 340-360

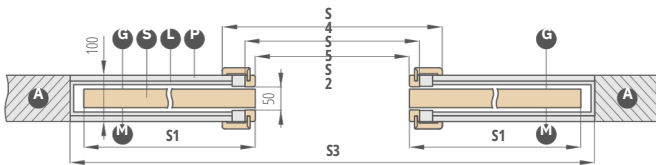

The drawing shows a one-sided the basic in-wall installation ZN1.

### SP2C.100 (AWERS obverse glazing)

Fixed range of 100 mm

Pocket thickness before gypsum board installation – 75 mm

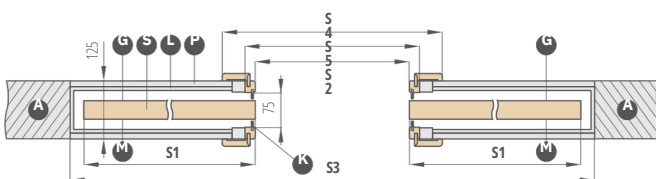

For UNO PREMIUM, ALTAMURA 1 only, and for all panelled doors.  
The system does not come with dust brushes (not required).

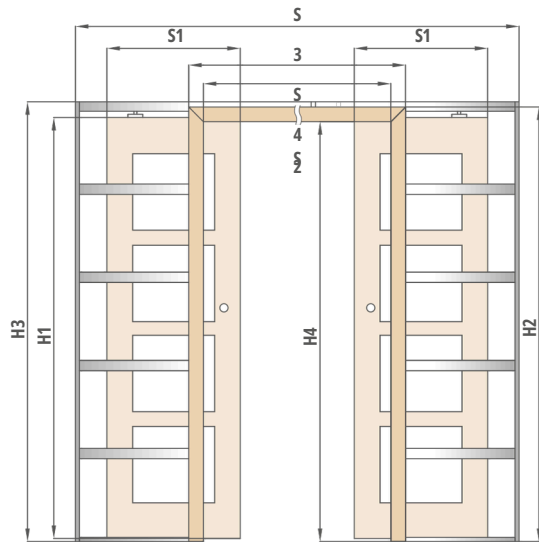

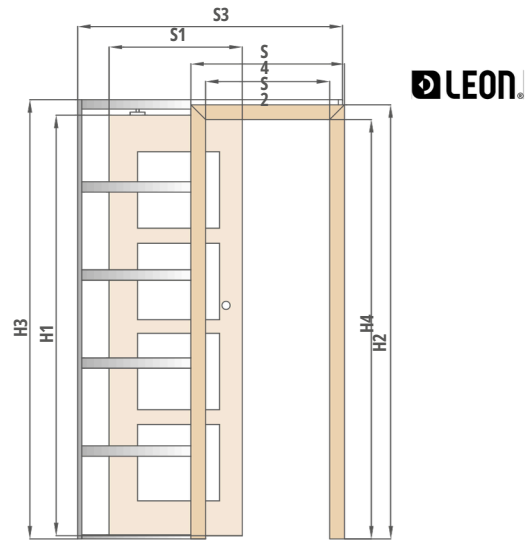

### SP2C.125 (AWERS obverse glazing)

Fixed range of 125 mm

Pocket thickness before gypsum board installation – 100 mm

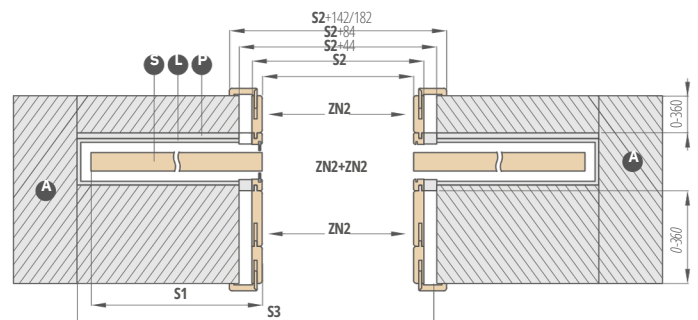

Only for use with flush doors which are supplied with a glass frame.  
The system includes grey dust brushes.

### ZN2 one-sided basic in-wall installation for SP2C.100 and SP2C.125

Basic in-wall installation range from 0-40; 40-60; ... 340-360

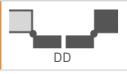

The drawing shows double-sided the basic in-wall installation ZN2 + ZN2.

# DOUBLE DOORS

## REBATED AND NON-REBATED

### USEFUL INFORMATION

#### DOUBLE DOORS

- The double doors are supplied with a solid core infill for extra charge.
- The double doors are made according to available models of the flush single doors, STILE panelled doors with respective features: colour, finish (STANDARD, SOFT), glazing etc.
- Double doors available in CPL 0.2 & CPL 0.7
- Passive doors use pull latches.
- Under "60" width passive door available as a solid core, plain version only – side panel (see drawing below).
- Side panels are made in the STANDARD edge flush technology. Available with a honeycomb infill as standard or solid core panel for extra charge. Grain direction of the side panels is vertical.
- Both active and inactive door leaves come with lippings.
- Lippings in CPL 0.7 door leaves are laminated with CPL 0.2
- The double doors in non-rebated technology are available with a magnetic lock only.
- Double non-rebated leaf doors come with an adjustable door frame only.
- Electric door strike is not available for the double doors.
- PL2112 Standard for selected door leaves

### AVAILABLE DOOR LEAF WIDTHS

# SIDELIGHTS FOR DOORS

## REBATED

### GENERAL INFORMATION

The top and side lights are preassembled and glazed with the VSG 331 safety glass in a frosted or clear variant. (Please state your choice of glass when placing orders). Additional components (e.g. wooden posts) may be required to integrate the side/top lights to the door, or more precisely to the adjustable or fixed frame, which the installer selects and supplies according to the existing opening conditions. ERKADO does not sell these items.

Top lights for fixed door frame in double doors

# DOOR FRAMES

- The adjustable and fixed rebated door frames can be used for all types of ERKADO internal doors made in both flush and STILE panelled technologies.
  - The adjustable non-rebated door frames can be used for internal doors made in both flush and STILE panelled technologies. These door frames are supplied with three concealed hinges.
  - The door frame is made with high quality MDF board and covered with durable wood grain film or coated with durable UV paint.
  - Depending on the technology, the door frames are faced with: GREKO, CPL, PREMIUM and UV paint.
  - The frames for STILE panelled doors have a third hinge as standard.
  - Each adjustable or fixed door frame is complete with frame components (striker plate, hinge plate and top beam), hinges and mounting screws. The components are supplied with pre-drilled holes for fixing.
  - Each set is enclosed with assembly manual and warranty certificate.
- The fixed door frame for Herse collection is rectangular and its core is made of glulam timber.

# TUNNEL TYPE ADJUSTABLE DOOR FRAME

## REBATED / NON-REBATED

### TUNNEL TYPE DOOR FRAMES

The tunnel type door frames are adjustable door frames without any hardware. They are made with a top strip and two vertical strips.

They can be used to finish door openings and safeguard wall corners, but mainly are fitted for interior decoration effects.

The tunnel type adjustable rebated door frames are also used in the ERKADO sliding systems.

The tunnel type adjustable non-rebated door frames are not used in the sliding systems.

Depending on the system, we use the following rebated tunnels:

<b>TUNNEL FOR SP1N</b>	Wall-mounted single sliding system
<b>TUNNEL FOR SP2N</b>	Wall-mounted double sliding system
<b>TUNNEL FOR SP1C.100</b>	Single "100" pocket sliding system
<b>TUNNEL FOR SP2C.100</b>	Double "100" pocket sliding system
<b>TUNNEL FOR SP1C.125</b>	Single "125" pocket sliding system
<b>TUNNEL FOR SP2C.125</b>	Double "125" pocket sliding system
<b>Encasing ZN1</b>	Wall encasing for one side of the single door systems SP1C.100 and SP1C.125
<b>Encasing ZN2</b>	Wall encasing for one side of the double door systems SP2C.100 i SP2C.125

"100"	1044	1024	1018	964	992	998	1133

F – min. dimension of the steel frame opening, on which to fit an overlay door frame.  
 This dimension can exceed the recommended one by max 20 mm. For greater frame opening, ensure the architraves cover the wall appropriately.

<sup>1)</sup> allowable deviation due to frame dimensional tolerance of +/- 3 mm (we recommend to check before installation)

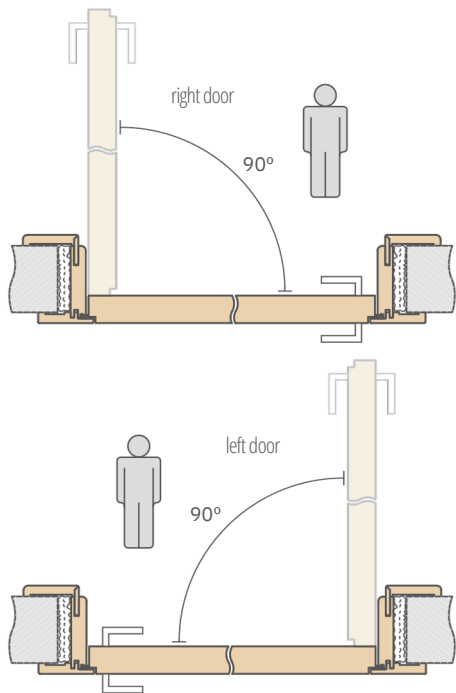

- Ⓐ – steel door frame
- Ⓑ – wall
- Ⓒ – floor
- Ⓓ – handle
- Ⓔ – aluminium profile with gasket
- Ⓕ – range from 80 mm to 255 mm

- 120 mm and 55 mm extension for overlay frame – at extra charge (price includes complete set for given frame width)
- Standard square for overlay frame – at extra charge (price includes set for frame of given width)
- Square with an extended tongue – at extra charge

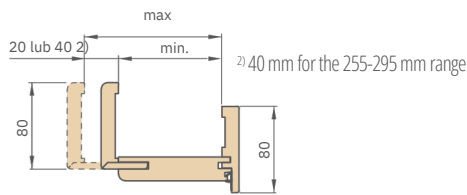

- Tunnel type door frame for widths of 60, 70, 80, 90, 100 are at the price of the adjustable overlay door frame.
- The tunnel is of the same dimensions as the overlay door frame and is not pre-drilled for hinge or door striker plate, but is supplied with a gasket.
- Prices of door frames for double-leaf doors + 30%

<sup>3)</sup> widths 60N, 70N, 90N only available for ALTAMURA 1, BALDUR 1 and UNO PREMIUM models

**NOTE: The working range of frame will be reduced by 3 mm (for single-sided use) or 6 mm (for double-sided use) when a set (crossheads + pilasters) for the reverse are selected. Example: assume a 140 mm thick wall with a single-sided set to be 143mm thick, while with a double-sided set to be 146 mm thick, and look for a corresponding range in the table for rebated frames (p. 171), non-rebated frames (p. 168) or reverse frames (p. 167).**

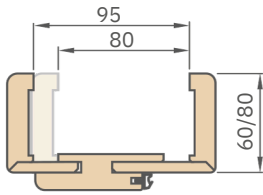

- The frame for reverse doors is available as a standard with 8 cm square joined at 45 degrees or 90 degrees at an extra charge (not available for 75-95 mm)
- The frame includes two mortise hinges invisible when the leaf is closed or an optional third hinge at an extra charge
- Available facing layers within the colour group: GREKO, PREMIUM, ST CPL and WHITE TITANIUM UV varnish
- Option to use black or golden hinges and strike plate – at an extra charge
- Changing the range by +20 mm (available in the ranges from 135-155 mm to 235-255 mm) – at an extra charge (option available from 06/05/2024)
- 120 mm and 55 mm extension for reverse veneered and painted frame – at extra charge (price includes complete set for given frame width)
- Adjustable square with extended leaf by 2 cm and standard square for adjustable frame in all veneers and lacquers -at extra charge(price includes set for given frame width)
- The door frame above 295 mm is composed of two parts
- Top panels can be glued to the wall for an additional charge page 140
- PL2112 standard surcharge 15 %

<sup>1)</sup> allowable deviation due to frame dimensional tolerance of +/- 3 mm (we recommend to check before installation)

<sup>2)</sup> PL2112 Standard for a surcharge of 15%

<sup>3)</sup> widths 60N, 70N, 90N only available for ALTAMURA 1, BALDUR 1 and UNO PREMIUM models

- A** – foam
- B** – wall
- C** – floor
- D** – rubber gasket

**NOTE:** The working range of frame will be reduced by 3 mm (for single-sided use) or 6 mm (for double-sided use) when a set (crossheads + pilasters) for the non-rebated adjustable door frame is selected. Example: assume a 140 mm thick wall with a single-sided set to be 143mm thick, while with a double-sided set to be 146 mm thick, and look for a corresponding coverage in the table for rebated frames (p. 171), non-rebated frames (p. 168) or reverse frames (p. 167).

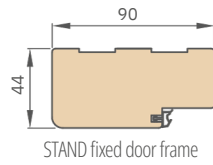

- PL2112 standard frame **+15%** on the frame price before surcharges
- Adjustable rebate-free door frame in CPL0.2 is also used in combination with doors in CPL0.7
- Option to use black or golden hinges and strike plate – at an extra charge
- Joints at 90 degrees possible for door frames with the 8 cm architraves only. Extra charge for frame joints at 90°
- The door frame above 335 mm is composed of two parts  
Prices of adjustable door frames for double doors **+30%**  
120 mm and 55 mm extension for non-rebated veneered, CPL 0,2 and painted frame – at extra charge (price includes complete set for given frame width)

- Adjustable square with 2 cm extended tongue and standard square for adjustable door frames available in all veneers as well as CPL 0,2 and painted – at an extra charge (price for a door frame set of respective width) – for 6cm and 8 cm architraves
- Tunnel type door frame for widths of 60, 70, 80N, 80, 90, 100 are at the price of the adjustable overlay door frame.
- Tunnel type door frame for widths of 110, 120, 130, 140, 150, 160, 170, 180, 190 are at the price of the adjustable door frame for rebated double-leaf doors (see Table p. 150)
- Top panels glued to the wall (only for frames with 8 cm corner) - p. 140
- Electric door strike (only available for lever tumbler lock) – at an extra charge  
Changing the range by +20 mm (available in the ranges from 135-155 mm to 295-315 mm) – at an extra charge (option available from 06/05/2024)

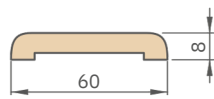

# FIXED DOOR FRAME

## REBATED DOOR LEAVES

### FIXED DOOR FRAME

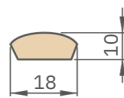

### ARCHITRAVES 8mm
